

TOUR, PANEL & Happy Hour

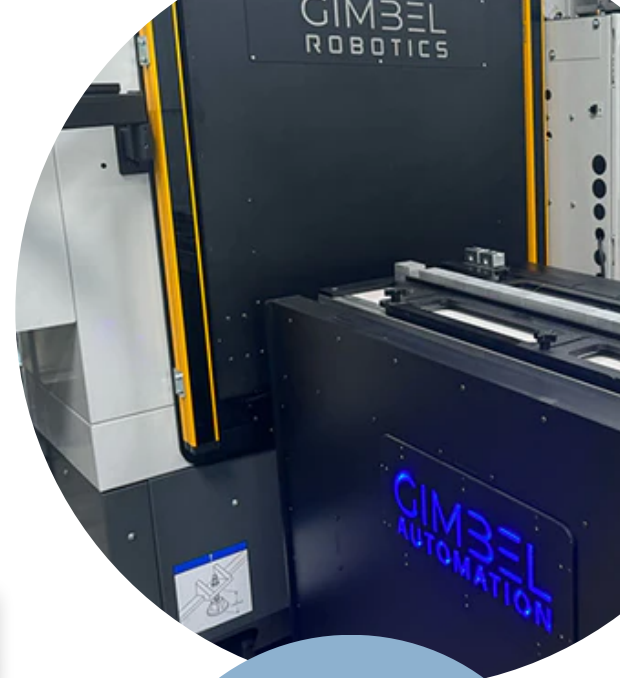

GIMBEL AUTOMATION

Join us for a panel discussion and tour at Gimbel Automation on January 23. Stay for mingling and happy hour after!

Gimbel Automation is the leader of In-Machine CNC Automation, where your CNC acts as its own robotic part loader. Our mission is to make automation have ROI delivered in days instead of years, and we make that possible for shops across the globe every day with products ranging from our CNC Spindle Grippers and Air Vises, through complete turn-key automation systems.

SCHEDULE:

- Tour the production and showroom facilities
- Show how NTMA members can potentially automate their machines with a much lower barrier to entry using in-machine automation (spindle grippers & automation)
- Live demos of at least three different machines showing low-cost automation systems for CNC Verticals
- Discussion of lean systems and processes that allowed Gimbel to quickly scale their company (and how members can apply those principles)

THURSDAY
JAN 23
2025

TOUR 
3PM - 5PM
HAPPY HOUR
5PM - 6PM
