Rancho Factory Showroom
2605 Homestead Place
Rancho Dominguez, California 90220

Presented by the Southern California Chapter of

Your NTMA

An exploration of Robotics, Automation and the realities of using them.

Join us as a panel of experienced machine shop managers will discuss implementing automation solutions in machining operations. Speakers will represent three different levels of implementation:

- Full, "lights out" automation for long part runs
- Automation that is set up and run unattended for several hours
- Partially tended automation that extends worker productivity

There will be raffles, and giveaways including tools from Kennametal valuing \$1000!
